

Home Economics

Food for a Healthy Life Style

Pupils develop an understanding of what comprises a healthy diet. Dishes high and low in particular nutrients are prepared and evaluated. Results are explored.

Maths

Place value of numbers, ordering and rounding. Understanding multiplication and division. Fractions, decimals and percentages. Ratio and proportion. Shape and space reasoning. Measures including problem solving

Art & Design

Containers

The Craft Tradition is explored, making vessels and containers. 3D forms are built - a vessel or container to hold something of pupil's own choice. Consideration of contemporary designers and ceramicists. Focus on work from different cultures.

Computer Studies

Design, write and debug programmes that accomplish specific goals, including controlling or simulating physical systems. Use sequence and repetition in programmes, work with variables and various forms of input and output

English

Media development – writing media stories. Reading different media pieces and analysing the role of the media in society. Positive and negative impact of media. The editor's point of view.

Year 5 Curriculum Overview Lent Term
